

Tales of Tribute AI Competition COG 2025

Jakub Kowalski, Dominik Budzki, Damian Kowalik,
Katarzyna Polak, Radosław Miernik

University of Wrocław, Poland

UWR Competitive Ai Team (UWR-CAT)

Scripts of Tribute framework

- ★ Based on The Elder Scrolls Online deck-building minigame Tales of Tribute
- ★ Reimplementation of the game in C# .NET Core
- ★ Allows writing agents, and playing games human vs AI, and AI vs AI

Scripts of Tribute framework

GUI

- ★ GUI for human vs open hand AI play (in Unity, builds for different OS's provided)
- ★ Shows agents logs and detailed play history
- ★ Suitable for debugging your bot
- ★ New version – total overhaul for 2025 edition!

Game Runner

- ★ Console Game Runner for AI vs AI play
- ★ Allows large-scale testing
- ★ Logging options available

Engine features

- ★ Seeded simulation mechanism for handling hidden information
- ★ Logging functions

Scripts of Tribute framework

Programming Languages Allowed

- ★ C# – native to the framework: access to game methods, forward model available
- ★ Python – connected to GameRunner via gRPC protocol.
Official ***scripts-of-tribute*** python package available.

Available Agents

- ★ 8 Sample agents:
Random, Max Prestige, Patron Favors, Max Agent, Decision Tree,
Flat Monte Carlo, MCTS, Beam Search
- ★ All agents from previous competitions

Environment Setup

- ★ Dockerfile provided
- ★ Video with instructions

Submitted Agents

(8 participants, 11 submissions)

BestMCTS3 by [Adam Ciężkowski](#), [Artur Krzyżyński](#) (University of Wroclaw), C#

Council Of Two and **ZMyBot** by [Thomas van Rossum](#), Python

EBot_C and **EBot_F** by [David Castejón](#) (Escuela Técnica Superior de Ingenierías Informática y de Telecomunicación), C#

HQL_Plus_BOT by [Helik Thacker](#) (RWTH Aachen), C#

MaltheMCTS by [Malthe Sørensen](#) (Aalborg University, Denmark), C#

MCTS_MMHVR by [Alessio Iacullo](#), Python

NAgent, by [Niklas Angert](#) (Johannes Kepler University Linz), Python

Sakkirina and **SakkirinaSolo** by [Katsuki Ohto](#), C#

Evaluation

Given 11 agents, we did not include any example agents in the evaluation.

Agents play against each other in rounds, every round having 8 games between every pair of players. Overall, each agent played 5,440 games, and we score them based on the average winrate.

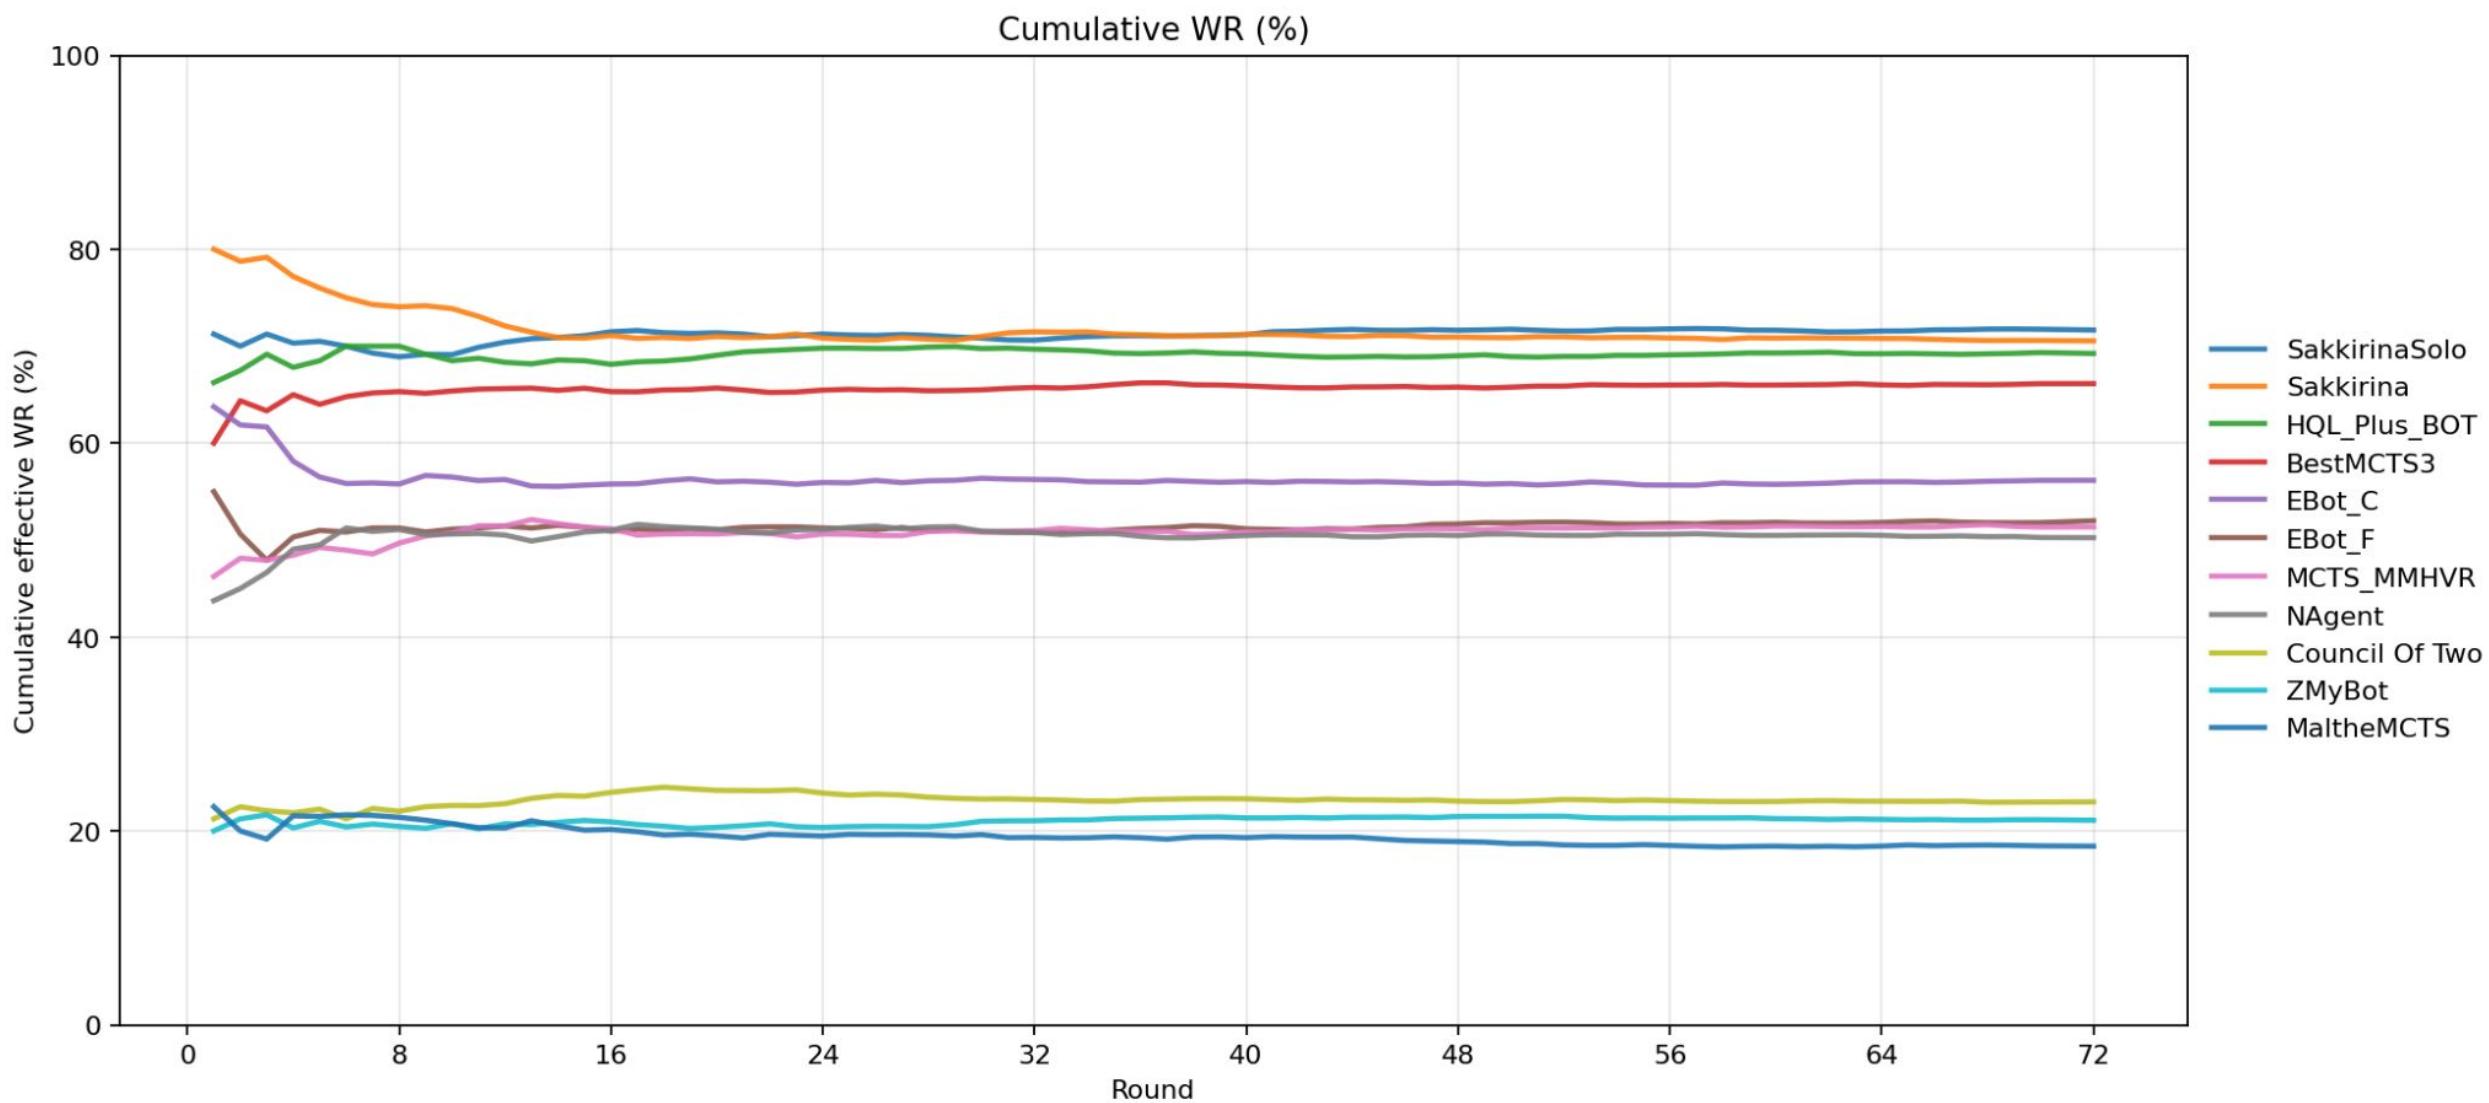

Running setup: Ubuntu 25.04, .Net 8.0, 4 CPUs (Intel), 8 GB RAM.

All participants source code, competition data, and running scripts are available at <https://github.com/ScriptsOfTribute/ScriptsOfTribute-CompetitionsArchive>

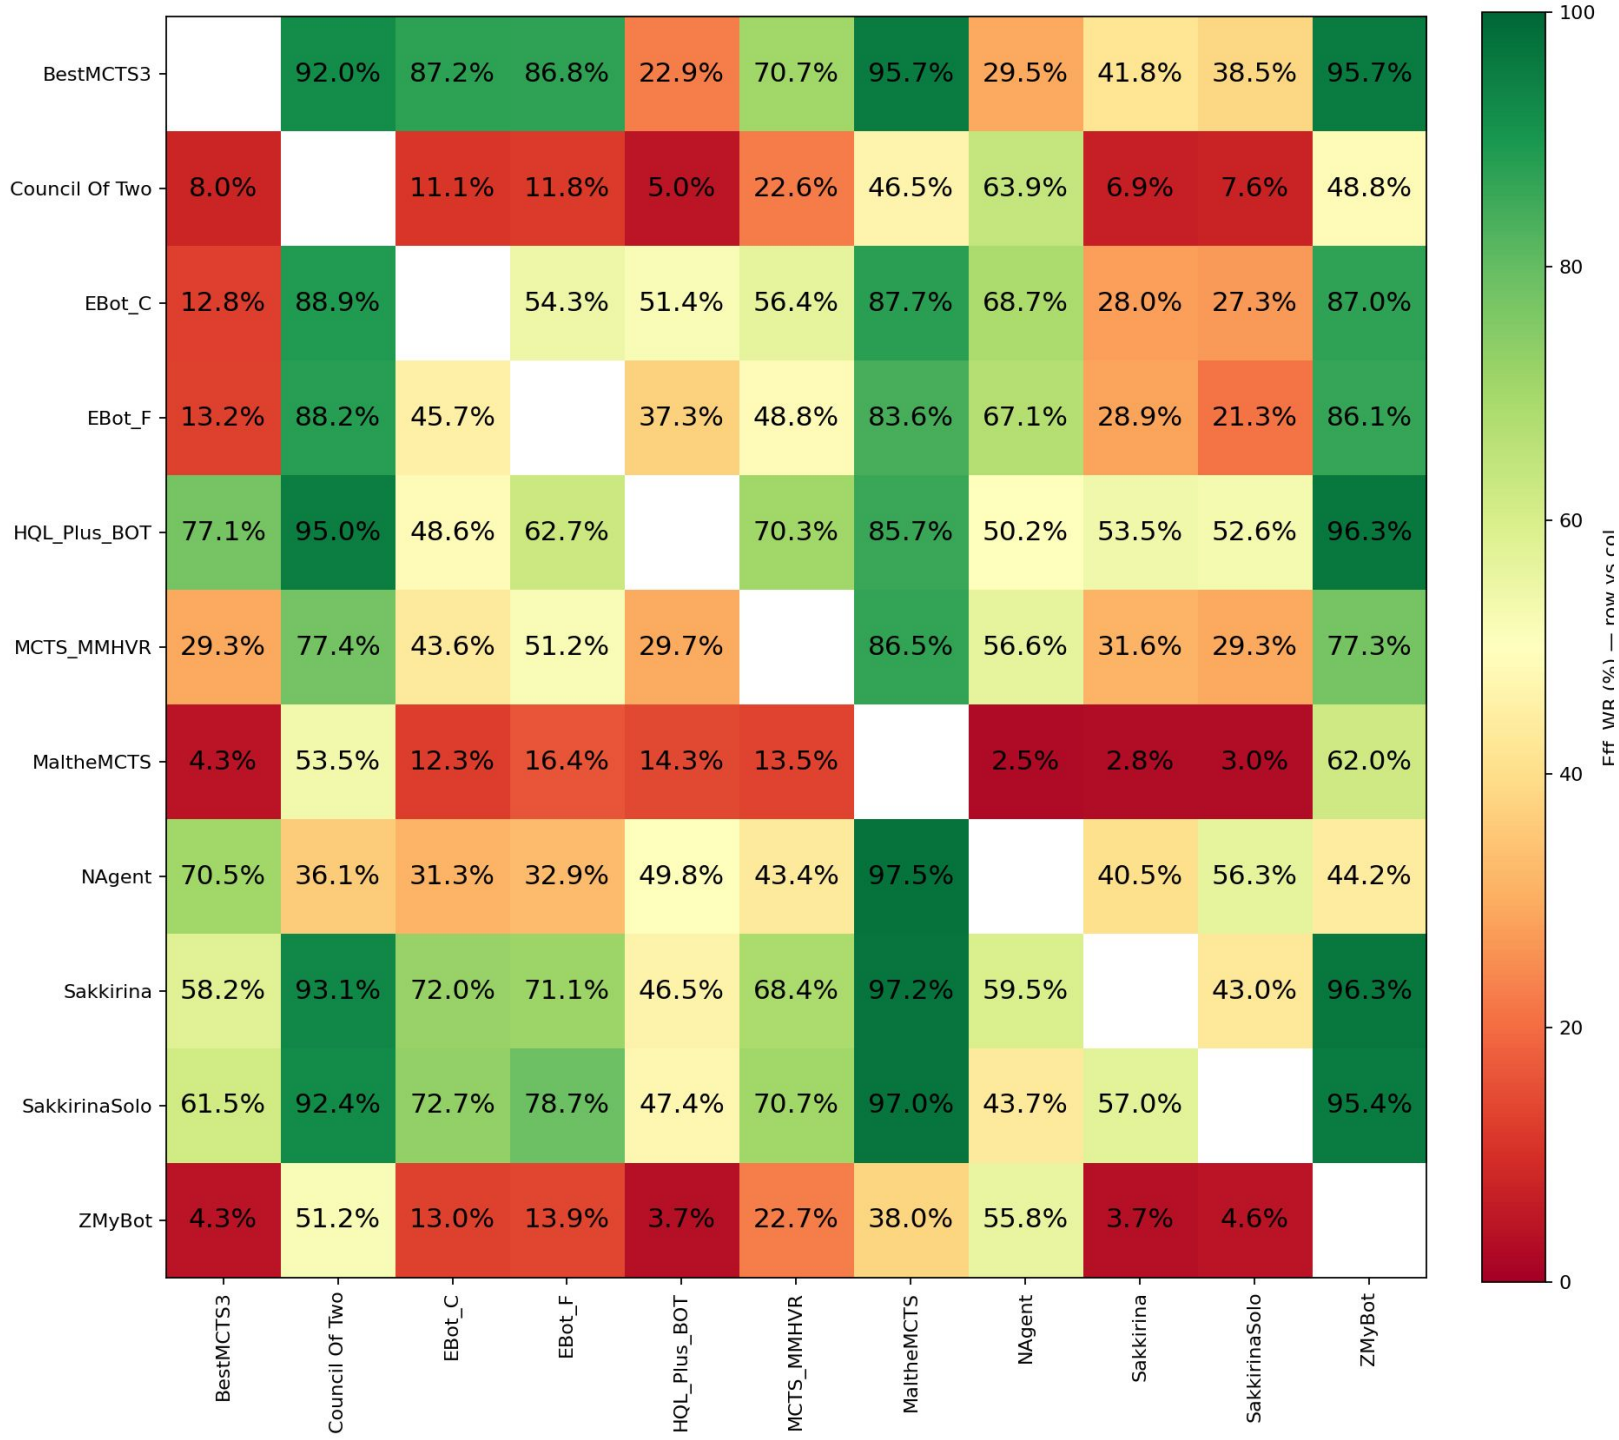

Results (final)

Agent	Games	Wins	Draws	Losses	WR%
 SakkirinaSolo	5440	3908	0	1532	71.84
Sakkirina	5440	3841	0	1599	70.61
 HQL_Plus_BOT	5440	3765	0	1675	69.21
 BestMCTS3	5440	3594	0	1846	66.07
EBot_C	5440	3048	0	2392	56.03
EBot_F	5440	2817	0	2623	51.78
MCTS_MMHVR	5440	2798	0	2642	51.43
NAgent	5440	2741	0	2699	50.39
Council Of Two	5440	1244	0	4196	22.87
ZMyBot	5440	1151	0	4289	21.16
MaltheMCTS	5440	1013	0	4427	18.62

Results (per round)

Results (1vs1)

Future editions

Planned for **COG 2026**

- ★ Framework improvements:
 - External Language Adapter
 - QoL changes according to users' input
 - GUI improvements
 - More setup options
- ★ Balance changes according to ESO patches
- ★ Changed decks pool
- ★ Example agents in other languages (using External Language Adapter)
- ★ Whatever we can improve to make YOU participate
